

# Hurst Family Dentistry

---

---

September 23, 2008

Dear Professional Development Programs:

Our office has been using the "Video Dental Assisting School" series for 3 years now and we firmly believe it is the best program on the market. The DVD's are high quality and the information goes beyond the nuts and bolts of dental assisting. I especially appreciate the emphasis placed on "image" and "collections". Our new hires understand the business of dentistry from a doctor's perspective and that helps everyone to be on the same page. In my opinion, it is a stand alone program. A person new to dentistry can watch the DVD's and with a little studying and on the job training will be ready to contribute.

Thank you,

  
Steve Hurst, DDS
